PROFESSIONAL SUMMARY

Software Engineer with proven experience delivering enterprise-level web applications across CRM, HRMS, and Student Management Systems for over 500 active users. Adept at improving system reliability, optimizing database performance, and taking ownership of critical modules in production environments. Skilled in full-stack development, complex API integrations, and clean architecture, with a strong focus on modern backend technologies (Spring Boot, Go, .NET) and scalable system design.

WORK EXPERIENCE

Associate Software Engineer

Jan 2026 – Present

eArrow Pvt Ltd, Sri Lanka

- Led the architectural revamp of the Center for Banking Studies (CBS) Student Management System, transforming a legacy platform and achieving a ~90% reduction in reported production issues.
- Designed and implemented the Advanced HRMS using Spring Boot and Angular, delivering complex, client-driven enterprise enhancements for the Anura Group.
- Optimized database queries and refactored core backend logic, significantly improving system performance and maintainability across multiple enterprise-scale applications.
- Delivered end-to-end features across cross-functional CRM, HRMS, and SMS platforms utilized daily by 500+ users.
- Collaborated in Agile environments, actively contributing to sprint planning, technical architecture discussions, and UAT cycles.

Trainee Software Engineer

Apr 2025 – Dec 2025

eArrow Pvt Ltd, Sri Lanka

- Developed and maintained enterprise web applications utilizing PHP (CodeIgniter), JavaScript, and MySQL within an MVC architecture.
- Engineered critical features and resolved bugs for Higher Education Management Systems deployed at Universal College Lanka (UCL), CBS, and SLITHM.
- Executed REST API development, third-party integrations, and secure data handling processes for live production systems.

Software Engineering Intern

Oct 2024 – Mar 2025

eArrow Pvt Ltd, Sri Lanka

- Contributed to the backend development and API integration of PHP-based applications within a LAMP stack environment.
- Implemented data visualization features and conducted rigorous testing and debugging across internal and client-facing CRM/HRIS platforms.

EDUCATION

BSc (Honours) in Software Engineering

2022 – 2026

University Of Kelaniya, Sri Lanka

- **GPA:** 3.52/4.0 (Second Class Upper)
- **Research Thesis:** A decision support system for intelligent selection of agentic AI frameworks: A multi-criteria evaluation approach.

KEY PROJECTS

HRMS Pro - Enterprise Human Resource System

GitHub

- **Stack:** Go, Angular, PostgreSQL, Docker, JWT, gRPC
- Architected a modular enterprise-grade HRMS for employee management, attendance, and payroll workflows.
- Built highly scalable RESTful APIs in Go utilizing clean architecture principles for optimal maintainability.
- Integrated containerized microservices using Docker and implemented gRPC for high-performance internal service communication.

Banking App - Core Banking Management System

[GitHub](#)

- **Stack:** .NET 8 (C#), Entity Framework Core, SQL Server, Vue.js 3, Vite
- Developed robust RESTful APIs using .NET Minimal APIs to handle end-to-end core banking functionalities.
- Integrated Entity Framework Core for secure data persistence, schema migrations, and relational data optimization.
- Engineered a responsive admin SPA with Vue.js to seamlessly manage users, branches, and financial transactions.

LMS - Advanced Learning Management System

[GitHub](#)

- **Stack:** Java, Spring Boot, Angular, PostgreSQL, OAuth2
- Built scalable backend services leveraging Spring Data JPA for persistence and MapStruct for object mapping.
- Implemented a dual-token JWT architecture and Role-Based Access Control (RBAC) via Spring Security.

TECHNICAL SKILLS

- **Backend Development:** Java (Spring Boot), Go, C# (.NET 8), Node.js, Express.js, Python (FastAPI), PHP (CodeIgniter)
- **Frontend Development:** Angular, React.js, Vue.js, JavaScript, Tailwind CSS, Bootstrap
- **Databases & DevOps:** PostgreSQL, MySQL, MongoDB, SQL Server | Docker, Git, Vercel, Postman
- **Architecture & Concepts:** REST APIs, Microservices, gRPC, Clean Architecture, SOLID, JWT, OAuth2, CI/CD

CERTIFICATIONS & EXTRACURRICULAR

- **Certifications:** AWS Cloud 101 & Compute Fundamentals (2025), Generative AI - LinkedIn (2025), MERN Stack (2024)
- **Leadership:** Subcommittee Member, IEEE WIE Student Branch - University of Kelaniya (2023–Present)
